Consulting with Passion

● ■ ● ■ **Tunnelling Consultant GmbH –
Competence, Experience, Passion**

You have a vision!
We realize it !

You are looking for an experienced partner, who accompanies you with a reliable hand through every stage of your project!
We are your specialists in tunnelling and underground construction works! Together with us your tunnelling project has always a safe stand.

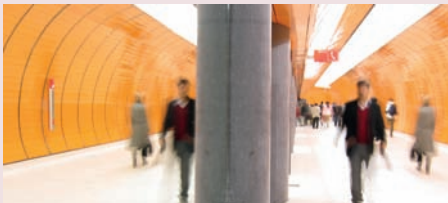

From draft to completion -
we show you, how your project plans become reality!

We will advise you! From us you will learn if and how your project can be realized.
We show you, how your tunnel fits under and in the landscape.

By means of our **feasibility study** your project will get its technical engineering basis. Regardless in which ground you want to “tunnel” - **we prepare the appropriate concept for you!**
On the basis of long years of experience and technical expert knowledge we assure you by means of our **risk analysis and risk assessment.** From us you learn about the weak points in advance.

Thus you will be on the safe side from the very beginning!

Object-planning - diligence and technical engineering professionalism!
Each project concept is only as good as its implementation. We render the **design, approval planning and the plan of execution,** develop residential and commercial areas and plan bridges and other civil engineering structures.

As **project manager** we always have the highest efficiency for your project in mind!
We place the different project phases to their most convenient positions, link them according to their dependencies, check and control all aspects. Thus we achieve the highest efficiency of your project.

Structural analysis – statics is indispensable! You can't see it, but without it no object would exist. Who disregards its laws risks damages for the object and possibly severe consequences.

As **consulting engineers** we are members of numerous professional associations and possess of comprehensive experience in structural design and planning.
Whether special underground works, bridges or other civil engineering structures - **we know what we are talking about.**

Our **claim management** is based on long years of practical knowledge in building laws, technical evaluations and experience with different kinds of ground.

We are geotechnicians and structural

engineers with the necessary negotiating skills to represent you comprehensively in this area as well.

Expertises with professional expert knowledge! Every now and then things don't work out as planned. With the aid of our expertises and know-how we guide you back on track. **Tunnels and bridges are our special subjects.**

**Tunnelling Consultant GmbH –
we realize your ideas!**
